Kinda unnecessary add-on to the game with even higher difficulty & minor bugs included. Nothing special but Tte end amused me.

Gets a pass!. Solid experience from what I've played so far. The controls are mapped out pretty well so you feel like you have a good handle on things and the overall navigation of each maze is fairly intuitive. The geometry and lighting make it feel immersive. Also, each level is uniquely generated when you start the game, so each time you play it is a new experience. This also helps with the multiplayer aspect as no one can memorize the levels and have an unfair advantage.. I payed 5 dollars for this dlc and even then it feels like it has such little content.

Some of the added platforming is fun such as having to shoot floating eyes to create new platforms that are often on a timer, but in the end you are playing the exact same levels over and since the main game is all about playing the levels over and over again this time around is completely unwelcomed. Risky plays different than Shantae in that she has different abilities but none of them are all that interesting. Shantae half genie hero is probably my least favorite Shantae game but I still greatly enjoyed it and got 100 percent in the game. If they would have added an all new adventure with new levels even if it was the same length as this dlc it would probably be worth the 10 bucks but as it stands I would not buy this for a dollar let alone 10.. I wouldn't pay for this, came bundled with the game.. Another abandoned early access game :(

i like the concept i just want it to friggin work. Wonderful, another crappy mobile games on Steam.. wtf is this. Excellent! I bought it for Tennis since I already have all the Pingpong games. For less than \$20.00, you get your own tennis court! The career mode make me coming back for more. I am stuck playing the champions because I am not a regular tennis player and it is not easy to play the champions (which is a good thing)

I wish I can play with someone. But there has not been anyone on line.

. Seems pretty dead. been playing with a friend but that's about it. I almost never find actual players. Just coms. It's pretty sad.. I didn't know what to expect whenI entered this game. What I got was surprisingly terrifying, and fun too. The gun controls are as simple as pulling the trigger (the guns automatically reload) and when a Zombie sneaks up on you, it's well, surprisingly terrifying. Overall this game may seem overpriced at first glance but the experience will bring you back time again, and is well worth it.. Great and slick game by a small development team (2 guys). They come from the Amiga community, and still support that platform, which is an added bonus.

The graphics is crisp, and the soundtracks are just awesome.

With regards to gameplay; its your standard shoot-em up, but well made. This style of game has been my favorite since the C64 and Amiga days.

Added bonus is that they plan to remake an Amiga version.

Highly recommended!. A beautiful game with a great amount of potential. You can tell this means a lot to someone. Mars and the moon look spectacular. The movement well thought out and executed elegantly. I look forward to seeing this game grow.
